

COOPER JACK MARINA

Summary: Karyn M. Erickson, P.E. as project manager for a 35 acre marina basin and condominium development, the Cooper Jack Marina project included field studies, numerical modeling of flushing to design the basin, shoreline stabilization, basin entrance channel design and permit drawings and environmental assessment preparation for acquisition of permits.

Location: Providenciales, BWI

Key Project Elements:

- Marina Planning and Design
- Field Investigations (Biological, Hydrographic, and Sand Source)
- Numerical Modeling
- Final Project Plans and Design and Contract Documents
- Environmental Assessment Plan
- Permitting

The project is presently under construction with ECE providing contract administration services related to the basin design to the Architects.
